MADE IN THE USA

From Liquid to Gas Flow, with ReGasPro!

55,000 SCFH Ambient Vaporizer

Model HBVP-55K

Base

Skid-Based

Trailer-Based

Specifications

Packager	ReGasPro
Model	HBVP-55K
Condition	New
Flow Rate	Up To 55,000 SCFH
Max Design Pressure	700 psi
Service	LOX, LIN, LAR, LNG
Design	-320F
Base (Optional)	Galvanize Steel Frame

Description

Mobile ambient cryogenic vaporizers for sale or lease to simplify operation and integrate seamlessly with cryogenic tanks for reliable and efficient regasification of cryogenic liquids to gas. Units capable of vaporizing LOX, LIN, LAR, LNG.

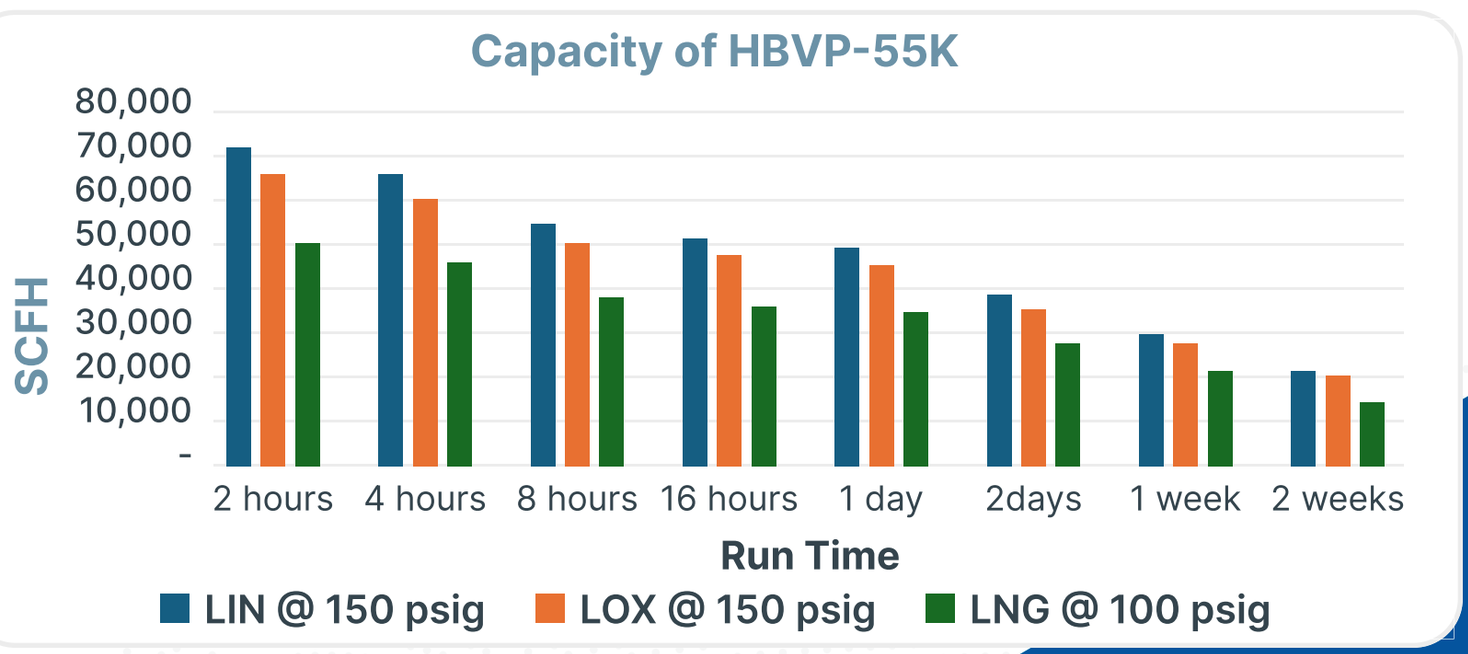
- "Plug and Play Solution" - simply connect, no welding required
- No external power source required
- Designed to operate in series or to alternate between vaporizers
- Lifting provisions for forklift and crane
- Standard 10-ft ISO locking footprint for easy transport

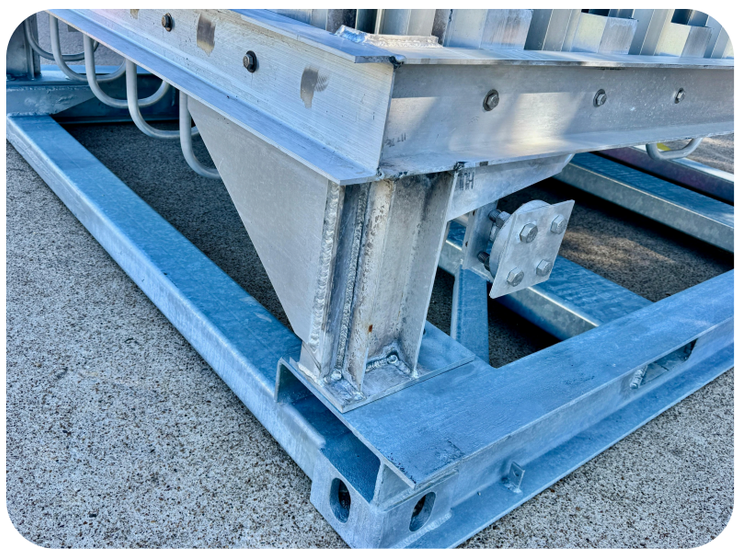
This is a very simple setup for your cryogenic regasification project needs.

***Optional components include regulators, pumps, odorizers, meters and more.

Dimensions

- Size: 11'5" L x 8'4" W x 10'1" H
- Weight: 3,850 lb
- Footprint: 10’ ISO Skid Design





Mechanical

- All aluminum construction
  - Alloy 6063 extrusions
  - Alloy 6061 structural
  - Alloy 6061, 5052 piping components
  - Welded base; crimped fin array for thermal flexibility
- Combination of 8-fin and 16-fin, 8-inch diameter extrusions with internal fins
- 1-1/2″ Inlet / 2″ Outlet ANSI CL300 RF Flange Connections

Design

- Certified for U.S. & Canadian Use
- Built to ASME B31.3 compliance standards
- MAWP – up to 700 psig
- Outlet temperature: 20°F approach to ambient
- Seismic design compliant with ASCE/SEI 7
- Wind load: Designed per ASCE/SEI 7; 120 mph
- Units cleaned, sealed, and tagged for oxygen
